Agency Publication Board Memorandum to DD/I,  
dated 17 November 1958

PIC Regulation \_\_\_\_\_, dated \_\_\_\_\_

25X1

#### 1. GENERAL

This regulation prescribes responsibilities and established standardized procedures to be followed in developing a uniform numbering system for the identification of PIC publication series.

#### 2. DEFINITION

The "numbering system" as used in this Regulation refers to the combination of letters and numbers which together formally identifies PIC publication series.

#### 3. RESPONSIBILITY

a. The Director, PIC, is responsible for ensuring that all publications produced and disseminated by PIC are properly controlled for identification and attribution. Division and Staff Chiefs are responsible for implementing the numbering system described below insofar as their activities are concerned.

b. The Chief, Publication Staff, is responsible for the assignment of numbers to finished Photographic Intelligence Publications. The Chief, Production Control Section, Technical Branch, DMD, will assign numbers to other Photographic Intelligence Center Publications.

c. Division and Staff Chiefs are responsible for the assignment of identification numbers to papers and Photographic Intelligence Publications prepared by their activities for internal and external use.

#### 4. PIC PUBLICATION NUMBERING SYSTEM

a. A separate numbering series will be established for each type of publication in the code word and non-code word series and for joint publications. The letters "PIC" will prefix the combination of letters and numbers identifying the publication series. Appropriate letters will be used to indicate the type of publication. Each series will be numbered progressively starting with "1" for the code word series and "1001" for the non-code word publication series. The number will be followed by the year (59).
